

Run Instructions (*Must have Node.js and MongoDB installed*)

Follow the **Dependency-Install-Guide.pdf** file for help installing Node.js or MongoDB.

Navigate to the server directory:

Open a terminal and cd into the server directory of the extracted trash-track folder.

Here we will use the path /home/joey/trash-track/ as an example trash-track folder path.

```
cd /home/joey/trash-track/server
```

Install node dependencies:

```
npm install
```

Run server:

```
npm run start
```

Now navigate to <http://localhost:8080> in your browser to use the application.
